Bridging the gap between design and manufacture, Citysquared offer a range of street furniture products and services; from off-the-shelf benches, planters, cycle stands, bollards and litter bins, to bespoke design, project management and installation. Our award winning in-house design team is experienced in working with clients from a variety of backgrounds and has a commitment to innovation in product design, urban design and public spaces. The design team is backed up by engineering expertise and a broad network of trusted suppliers, enabling us to design and fabricate across a wide variety of materials.

Our 10 year heritage has firmed our commitment to produce high quality design for current and future generations, alongside a determination to provide the highest levels of client service. Our wealth of experience has strengthened our belief that good design can enhance both the aesthetic and functionality of a scheme.

Continuing Professional Development

As continuing professional development has become a significant element of practice development in recent years, we have devised a number of CPD sessions from our ongoing research programme of practical and conceptual thinking. These sessions are delivered by our Creative Director, Tristan Williams. Tristan gained a BA (hons) from Brunell University, an MA from the Amsterdam School of the Arts, and prior to his involvement with Citysquared he spent many years running design courses in Higher Education. The following sessions are offered and generally delivered as part of a lunchtime programme at your office:

Session 1 - Street Furniture: A Design Approach

Session 2 - Bespoke Public Realm Seating: Practical Considerations

Session 3 - Teenage Kicks

Session 4 - Virtual Street

Session 5 - High Street Metamorphosis

Athos Bollard

The Athos post blends asymmetrical shapes into a symmetrical form, yielding a product that both challenges and pleases the eye.

Ideal for flanking entrances and doorways, the large open face of the post is designed to take signage and other graphics if desired.

Robust and durable, Athos is constructed from stainless steel.

Porthos Bollard

Porthos combines the simplest of design elements into a unique form that can work either as a stand alone bollard or connect to form a linked chain or rail fence.

Circular faces to either side provide an ideal space for signage and graphics, making Porthos the ideal bollard for delineating cycle paths and routes of interest.

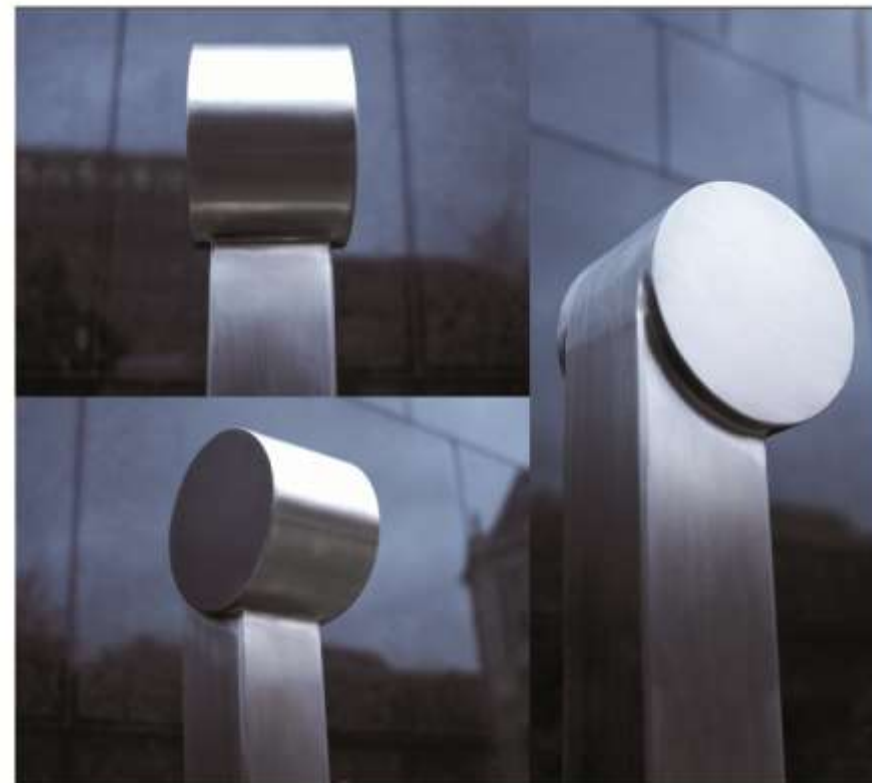

Porthos is fabricated in tough stainless steel.

Standard Cylinder Bollards

Citysquared's standard cylinder bollards are available in a range of diameters, lengths and fixing methods. The bollards are offered with a flat top, a semi-dome top or a 45° mitred top.

The simple clean design of these products means they are versatile enough to suit a range of other products within a scheme.

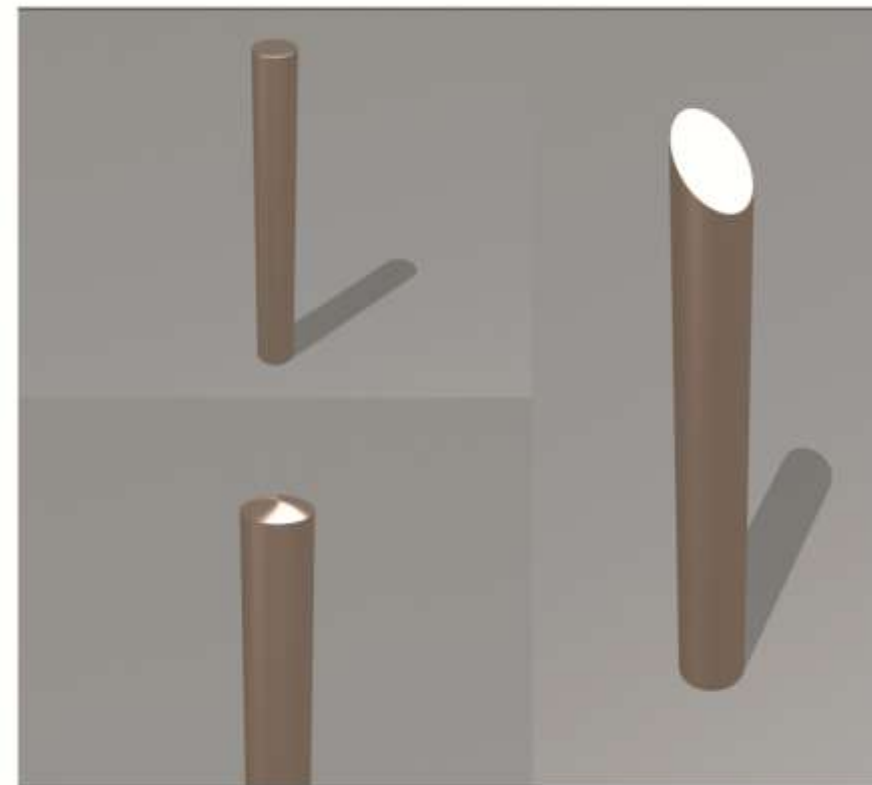

Fabricated from hardwearing stainless steel with either a brushed or mirror polished finish, these bollards require little or no maintenance. The products are also available with a powder coated finish if required.
